152 responses

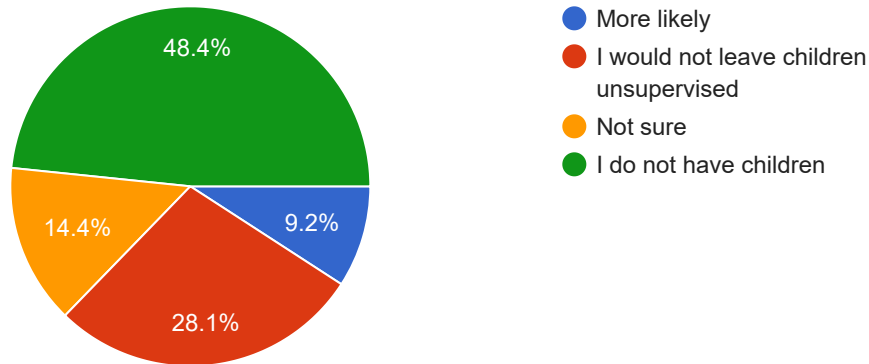

Do you want to use gesture-sensing radar technology to control your appliances? (sense motions are conducted up to 15 meters away from the phone)

149 responses

How likely would you be to leave your children unattended at a younger age if you could remotely monitor and safeguard your house (e.g., control lights, locks, and the TV)?

153 responses

Are there any additional features that you would like to have in the application?

45 responses

No

no

Ring when arsenal scores

Battery and energy(water, electricity...) consumption.

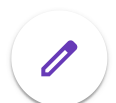

Alarm Mode: Takes pictures of intruder, start alarm and lock all the doors out the house to not allow him to escape

Nope there seems to be everything

No idea

reports

Maybe a way to ensure privacy as well as the security (cannot be easily hacked) .. (the

When you interact with your home appliances, what kinds of problems do you encounter?

43 responses

nothing

Ma fee kahraba

.

Latency

If someday it bugs and can't complete an action that is controlled with the app

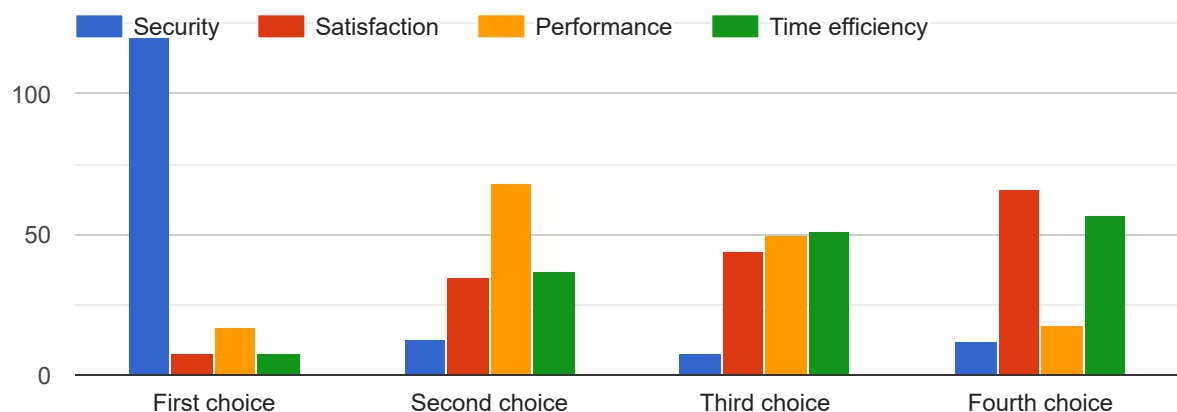

Forgetting the key inside the house when exiting

Nothing specific

Hygiene

Having everything not at the same place to do every simple action

In your opinion, What is the highest priority for the smart home application(You can arrange the most important first among the following items)

Google Forms
